

Bouba Ahmed

Full Stack & AI Developer

Khemisset, Morocco | ahmedbouuba@gmail.com | +212 628 987 577 | linkedin/boubaahmed | github/BoubaAhmed

Professional Profile

Full Stack and AI Developer with a Master's Degree in Intelligent Systems. Skilled in designing web and desktop applications, developing artificial intelligence models, and building mobile applications with Flutter. Proficient in Python, Django, React, Java, Machine Learning, databases, and Docker.

Projects & Research

EnsLMS — AI-Powered Adaptive Learning Platform 2025 – 2026

- Designed and developed a full-stack Learning Management System using Django, React, PostgreSQL, Redis, Celery, Docker.
- Built modules for user, academic program, course, assessment, and learner progress management.
- Integrated AI features for FSLSM-based learner profiling, educational recommendations, and LLM-powered content generation.
- Deployed the platform to production on an Ubuntu VPS using Docker Compose.

Research Project — Fraud Prediction Using Bayesian Neural Networks April 2025

- Developed and evaluated a Bayesian Neural Network model for fraud prediction.
- Contributed to the writing and submission of the paper *A Probabilistic Approach to Fraud Prediction Using Bayesian Neural Network* to the I2ASD conference hosted at ENS Meknes.

Professional Experience

Java/JavaFX Developer, ENS Tetouan – Human Resources Management System May – July 2024

- Developed a desktop human resources management application using Java, JavaFX, and MySQL using MVC architecture.
- Centralized employee, leave, and business travel management, with automated generation of administrative certificates.
- Used Git for version control and packaged the application as an executable JAR file.

Full Stack Developer, Fronton Center – Inventory Management Application April – May 2023

- Developed a Laravel and MySQL web application for product and inventory management.
- Contributed to feature integration, functional testing, and bug fixing within a development team.

Education

Master's Degree in Intelligent Systems, ENS Meknes 2024 – 2026

- Coursework in Artificial Intelligence, Machine Learning, Deep Learning, NLP, IoT, and recommender systems.

Professional Bachelor's Degree in Software and Web Development, ENS Tetouan 2023 – 2024

- Coursework in web development, software design, databases, project management, and version control with Git.

Technical Skills

Programming Languages: Python, Java, JavaScript, TypeScript, PHP, Dart, SQL, HTML5, CSS3.

Frameworks & Development: Django, Flask, React.js, Express.js, Laravel, JavaFX, Java EE, Flutter, Streamlit.

Artificial Intelligence: Machine Learning, Deep Learning, NLP, TensorFlow, PyTorch, scikit-learn.

Databases & Services: PostgreSQL, MySQL, MongoDB, Firebase, Redis, Celery.

DevOps & Tools: Docker, Docker Compose, Git/GitHub, Linux/Ubuntu, Postman, VS Code, Google Colab, Kaggle.

Additional Information

Languages: Arabic: Native | French: Working proficiency | English: Fluent

Certifications: Python Programming (Cisco); JavaScript Programming (Cisco); Introduction to IoT (Cisco); Git Essentials for Developers (Udemy); Microsoft Office Specialist – Word & Excel 2016.

Professional Strengths: Problem-solving, teamwork, communication, autonomy, and time management.

Interests: Artificial Intelligence, web development, IoT, sports, travel, and hiking.
